**DETAILED ACTION**  
**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The Applicant's arguments dated 4/23/2009, with respect to **claims 11-22** are persuasive and therefore the Examiner concludes that the claims are allowable over the closest prior art of *Vuoristo et al. "Subscriber Service Profiles In Telecommunication"*

Vuoristo et al. discloses a method for a terminal device to select service profile according certain events and notifies the network of the new service profile. The mobile station describer within, provides an inquiry message for detecting a subscriber specific service profile, whereby the service profile comprises services defined for the subscriber and settings which are defined from the network specific service. Whenever the mobile wishes to request information about the user's service profile, the information is request from the network. The SIM, as disclosed in Vuoristo et al., plays a passive role and is not involved in the processing of information for the device.

However, in contrast with comparable differences, the Applicant claims in the instant application:

***Regards to claim 11, "the SIM-generated message is generated in response to activation of the SIM in the terminal device, the SIM requesting device information from the terminal device and the device providing the device information to the SIM."***

***Regards to claim 14: the SIM requesting device information from the terminal device the device providing the device information to the SIM and the SIM formulating a***

communication comprising the device information and causing the SIM-generated communication to be transmitted to a network through the device.

**Regards to claim 20: the SIM requesting device information from the communication device, the SIM forming at least one message including at least part of the device and-or location information, the communication device communicating the message formed by the SIM to a communication network.**

As in the prior art, the request message is generated by the device and not the SIM. The instant Application teaches that the SIM is an "active" element capable of requesting and receiving device information directly from the terminal device and transmitting that information to the network, unlike the prior art whereby the information is requested by the terminal device from the network.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
